Access Request and Consent for Access Form - Hendrick 04222015.pdf

Hi David,

Thank you for returning my phone call today and giving us verbal access to collect water quality samples at the mine claims you own near Silverton, Colorado. I've attached the request for access and consent for access form. If you would sign and send the access form back, via email or mail, that would be great. I sent this via US mail today as well, which you can disregard.

Please let me know if you have any questions in the future.

Liz
